## Chapter 5

# Finite Control Volume Analysis <br> Homework Assignment \#6 

## Due in class on Monday, April 15, 2024

Students complete and submit the following problems from your textbook: 5.45; 5.47.

## Please also solve the problem below:

Find the horizontal force of the water acting on each meter of width of the vertical sluice gate shown in the figure below, given the water depths $h_{1}=3 \mathrm{~m}$ and $\mathrm{h}_{2}=0.8 \mathrm{~m}$. Neglect friction. The density of water is $1000 \mathrm{~kg} / \mathrm{m}^{3}$.
